

# David Clews

Managing Director

## PERSONAL SUMMARY

In 1997 I decided having gained experience to go it alone! Air cool midlands ltd was then born, the company soon became a recognised and established air conditioning contractor, working for many large blue chip customers such as Barclays and Network Rail, the company grew quickly adding project management staff and additional sales persons almost immediately, over the past 18 years additional departments have been added to provide Electrical Contracting, Mechanical Contracting and servicing of HVAC equipment.

Over the past 18 years air cool has experienced, busy profitable boom periods & less memorable periods, all of which have strengthened our resolve and added to our knowledge and experience.

## AREAS OF EXPERTISE
