

SERVICE & MAINTENANCE ENGINEER(S)

We are currently looking for experienced Service and Maintenance Engineer(s) in The Midlands.

This is a mobile role which involves extensive travel around the area, visiting commercial and industrial client sites to service and maintain air conditioning and refrigeration systems, either via call-out or scheduled maintenance visits. On occasion there may be the need to travel further with some overnight stays.

Requirements

- Must demonstrate experience and knowledge as service and maintenance engineer.
- Candidate must have good diagnostic and fault finding skills with air conditioning and refrigeration equipment.
- Have experience with varying air conditioning systems including, Daikin, Mitsubishi, Hitachi, Trane, Airedale.
- Ideally have experience with refrigeration equipment from splits to larger packaged systems.
- Demonstrate good organisational skills and the ability to prioritise work.
- Strong communication skills in order to feedback to the office inventories of on-site equipment and order any parts required to fix faults.
- Must hold Refrigerant handling C&G2079 or equivalent.
- Clear and strong customer service skills in order to liaise clearly and confidently with the client.
- Engineers are required to cover out-of-hours, on call service on a rota basis. All over-time is paid whilst covering this period.
- A full, valid UK driving license.

Standard working hours 40hours per week and cover out of hours call outs on a rota basis.

Competitive salary negotiable dependent on experience. Additional income to be earned from overtime and call out rota.
